

Write-up Finale Project

- **Synopsis**

In the image above you can see a window shop of Oil&Vinegar on the street Langestraat. The elements from the shop window consist in the table top where the ingredients and products are placed and organized. What we decided to use in the animation are: Pesto jar , Tomato jar , bruschetta sauce jar, Olive oil and mayo which can also be found in the window shop. We recreated the table top for the elements to be placed on and the shelves as well.

- **Usage and interactions**

- 1) The first interaction is the window shop appearing when the program is opened.
- 2) A message that displays the word menu which will open a list of items when pressed.
- 3) Images that are in the folder and used for representing the items in the window shop.

- **Architecture**

- The class is called menu and its purpose is to display the menu (as in name) after pressing the text in a specific order and font.

Diagram Code WindowShop
